

Service Module (SM)

Zvezda (Star)

Russian Federal Space Agency (Roscosmos)/
S.P. Korolev Rocket and Space Corporation Energia
(RSC Energia)

The Service Module was the first fully Russian contribution to the ISS. The Module provided the Station's early living quarters, life-support system, electrical power distribution, data processing system, flight control system, and propulsion system. Its communications system still enables remote command capabilities from ground flight controllers. Although some of these systems were subsequently supplemented or replaced by later U.S. systems, the Service Module remains the structural and functional center of the Russian segment of the International Space Station.

Attitude Control Engines
(6 clusters,
32 engines,
14 kgf each)

Luch Satellite Antenna

Igla Rendezvous Antenna

Maneuvering Reboost Engines
(2,300 kgf each)

Zenith Docking Port

Forward FGB Docking Port

Kurs Rendezvous Antenna

- 1 Airflow Vent
- 2 Body Mass Measurement Device
- 3 Camera
- 4 Caution and Warning Panel, Clock, and Monitors
- 5 Communications Panel
- 6 Condensate Water Processor
- 7 Crew Sleep Compartment
- 8 Forward Docking Port (to FGB)
- 9 Fuses
- 10 Galley Table
- 11 Integrated Control Panel
- 12 Lighting Control Panels
- 13 Maintenance Box
- 14 Nadir Docking Port
- 15 Navigation Sighting Station
- 16 Night-Lights
- 17 Power Distribution Panel
- 18 Recessed Cavity & Valve Panel
- 19 Smoke Detector
- 20 Solid Fuel Oxygen Generators (SFOG)
- 21 Toru Rendezvous Control Station
- 22 Toru Seat
- 23 Treadmill & Vibration Isolation System
- 24 Velo Ergometer
- 25 Ventilation Screen
- 26 Vozdukh Control Panel
- 27 Waste Management Compartment
- 28 Zenith Docking Port
- 29 Soyuz and Progress Docking Port

The SM under construction at Khrunichev State Research and Production Space Center in Moscow.

Leroy Chiao exercises in the SM.

|---------------------|--------------------------------------|
| Length | 13.1 m (43 ft) |
| Diameter | 4.2 m (13.5 ft) |
| Wingspan | 29.7 m (97.5 ft) |
| Weight | 24,604 kg (54,242 lb) |
| Launch date | July 11, 2000, on a Proton rocket |
| Attitude control | 32 engines |
| Orbital maneuvering | 2 engines |
